Waldo County General Hospital

Medical Office Building

Project Location

Belfast, Maine

Delivery Method

Construction Manager

Designer

The Maine Group / Sheridan Construction

Project Size

32,000 sf

Sheridan Construction completed a two-phase, medical office building for Waldo County General Hospital in Belfast, Maine.

The construction of this facility in Belfast allowed the hospital to double its Dialysis unit and reunite formerly separate office spaces.

"They built this place during the wintertime, in eight months, on time, and under budget. That's my style" says Jenness Robbins, head of the board of Waldo County General Hospital.

Building on our promise.
