Maine Air National Guard

KC-135 Aircraft Hangar

Project Location

Bangor, Maine

Delivery Method

General Contractor

Designer

Burns & McDonnell

Project Size

35,000 sf

Maine Air National Guard's new maintenance Hangar, located in Bangor, received a LEED rating of Silver, becoming the first Air National Guard facility to receive a silver rating. Designed to house the KC-135 refueling aircraft, this new hangar features a 200-foot clear-span structure with sliding aircraft doors. This hangar has approximately 23,500-square-feet of hangar space.

This project features a Butler Manufacturing's™ pre-engineered building, which was designed by Butler's Heavy Structures division.

Building on our promise.
