

**Sheridan  
Construction**

## Garmin

Global Village

### Project Location

Yarmouth, Maine

### Delivery Method

Design-Build

### Designer

PDT Architects / Sheridan Construction / Butler Manufacturing™ Delegated Design

### Size

87,000 sf

Sheridan Construction designed and constructed the Global Village Headquarters in Yarmouth, Maine. Sheridan Worked in collaboration with Butler Manufacturing™ & PDT Architects throughout the duration of this project.

Featured in this project is a 42-foot diameter globe, 50,000 square feet of office space, and 37,000 square feet of warehouse space.

During the construction of this project, Sheridan faced many challenges along the way. The forefront of these challenges was fitting a 42-foot globe within a 40-foot building. In order to overcome this challenge, Sheridan constructed a recessed pit for the globe's base.

**Building on our promise.**
